Author: Chuck Marunde Edit

The home buying process can be a bit intimidating if you haven't bought a lot of homes. Even if you've bought a couple of homes in different parts of the country, the home buying process is always unique to a local real estate market. This podcast gives you an overview of the home buying process from A to Z.

Home Buying Process

As I said on this podcast, you really need to do a good job with your due diligence. Buying a home is not something you want to make any big mistakes, especially if you are retiring. No one wants a nightmare in retirement? So I always recommend finding a very professional buyer's agent with experience and integrity, and I always recommend hiring a local mortgage broker. Buying a home is hard enough without mistakes or lack of knowledge that could cost you your dream home, and when I say "lack of knowledge," I'm not referring to you, but to the professionals you hire.
